

BAUSCH & LOMB TRIPLET MAGNIFIERS

The Hastings Triplet magnifiers are color corrected magnifiers. Three separate lenses, bonded together to form a compound lens, provide sharp, very distinct, magnified images — with no color distortion, even under 14 and 20 power magnification.

The plastic lens housing swings into a nickel plated case that protects the lens and serves as a handle.

CATALOG #	POWER	LENS DIA.	WEIGHT	PRICE
BL816168	7X	.78" (19.8mm)	.7 oz. (20g)	\$40.60
