

WIDE FIELD MAGNIFIER

This magnifier incorporates the combination of a wide flat field, high magnification and abundant working distance under the lens. The 220° cut-away base provides the room needed for critical

Features

- Over 1" (25.4mm) of working distance under the lens
- 220° cutaway base provides easy access to magnified area
- Excellent clarity and sharpness to lens edge
- Double achromatic glass lens system for total color correction
- Advanced AR lens coating to minimize internal reflections
- Wide flat design for distortion-free viewing
- Rugged black anodized aluminum lens cell
- Ring lock that sets focus for repeated use

touch-ups and minute mechanical changes to the subject matter. The crystal-clear acrylic base was specifically designed to permit both easy accessibility of tools and light to the subject matter.

LM STRIP/SLIDE VIEWING ADAPTER (not shown)

This handy frosted plastic adapter snaps easily to the base of the 6X wide field magnifier, allowing the viewer to critically examine 35mm slide or negative strips. Specifically designed supports hold the slide or film strip in the field of view, freeing both hands so that the magnifier can be held up to the light.
