

ZCMCounter Instructions

These instructions are meant to assist you in programming and operating our counter. Please contact us if there is anything you do not understand.

The counter plugs directly into the 4-pin receptacle on the face of the machine

To begin, plug the counter into the front of the ZCM1000 or ZCM1500. Turn the Dispenser ON and press the GO/STOP(red) button on the counter. The counter will display 0000.

Press PRESET(yellow) button to see the 8 preset values. (Press and hold the PRESET button to store a new preset, display will flash when new preset is recorded.)

Press GO/STOP when a value is displayed and the machine will run that many pieces.

If GO/STOP is pressed when unit is running, it will stop the machine and the display will flash to show that it is in the pause mode. Push GO/STOP again to restart.

If display shows 0 and GO/STOP is pressed, nothing will happen.
If display shows 0 and the AUTO button on the ZCM1000 is pressed, the counter will count up, showing the number of times the AUTO button is pressed.

Press the UP(green) or DOWN(black) buttons to set a value on the display.

Pressing the UP and DOWN buttons together will zero out the display.
